

Damien Ha

damienmaiha@gmail.com | damienmaiha@yahoo.com | (408) 826-9403

SKILLS

Programming/Technologies	Python (matplotlib, numpy, pandas, plotly, seaborn, sklearn, tensorflow), R (dplyr, ggplot2, rvest, shiny, tidyverse), Jupyter lab, C++, Tableau, SQL, Git/GitHub
Skills	Data Analysis, Mathematics, Statistics, Google Suite, Microsoft Office, Teamwork, Customer Service
Languages	American Sign Language (intermediate), Spanish (elementary), Vietnamese (elementary)

PROJECTS

Business Marketing Plan, Hermanos Gutierrez	https://github.com/damienmha/hg-marketing-plan
- Meet and converse with artist's agents to best understand goals with streaming, social media, concerts/live performances, etc. - Perform market research, analyze streaming data, form comprehensive business/marketing plan outlining artist's next steps - Produce business/marketing plan and present live to instructors and panel of professionals from the music industry	
Fish Weight Multiple Linear Regression	https://github.com/damienmha/Fish-Weight-MLR
- Conduct multiple linear regression in R on fish measurement data to better understand fishery health - Use diagnostic plots, stepwise regression, and variable selection/transformation, to produce regression model with R^2 of 0.99	
MCM 2022 Problem C: Trading Strategies	https://github.com/damienmha/Trading-Strategies
- Use pandas, numpy, matplotlib in Jupyter notebook to handle bitcoin/gold pricing data from <i>Mathematical Contest in Modeling</i> - Made mathematical models: threshold, momentum trading, moving average, and bitcoin prioritization to maximize profits	
Roller Coaster Classification	https://github.com/damienmha/coaster-classification
- Clean data, create data processing pipeline, do exploratory analysis, train classification models (ex: kNN, Logistic Regression, Support Vector Machines, Decision Tree) to identify coaster track type. Model performance: top accuracy and F1 scores ~ 95% - Train a neural network (deep learning) using Keras (TensorFlow), to also identify roller coasters by track type	

EDUCATION

University of California, Los Angeles	Sept 2020 - Sept 2025
BS Statistics and Data Science	
<i>Relevant Coursework:</i> Computational Statistics with R, Data Analysis and Regression, Data-Driven Mathematical Modeling, Introduction to Computer Science, Linear Algebra, Music and Data Science, Music Business Now, Principles of Accounting I, Principles of Economics, Probability and Statistics, Python for Data Science, Real Analysis, Statistical Consulting	
<i>Activities/Societies:</i> Association of Computing Machinery, Bruin Origami, DataRes (Data Journalist), Game Music Ensemble (clarinetist), Marching Band (clarinetist), National Student Data Corps (Board), Statistics Club, Symphonic Band (clarinetist)	

CERTIFICATIONS AND AWARDS

LinkedIn	Python Assessment, R Assessment
Kaggle	Introduction to Deep Learning
ASA DataFest UCLA	Finalist/Honorable Mention 2023, Best Use of External Data
California Department of Education	State Seal of Biliteracy in English and American Sign Language

EXPERIENCE

DataFest at UCLA	April 2023
<i>Hackathon Finalist</i>	<i>Los Angeles, CA</i>
- Collaborate in teams to analyze legal data, draw insights, allowing American Bar Association to allocate resources effectively - Source economic data, do time series analysis, produce visualizations with Python, Tableau. Validate the use of economic identifiers, found that unemployment and legal cases have 0.658 correlation. 2nd Place in <i>Best Use of External Data</i> category - Determine key factors in consumer finance/unemployment, advise use of regression, ARIMA models in future analyses	
Northeast Big Data Innovation Hub - National Student Data Corps, UCLA	Jan 2023 - June 2024
<i>Board Member - Project Leader</i>	<i>Los Angeles, CA</i>
- Host social events and compile resources to facilitate a community where all students interested in data science can learn - Assist in development of projects/workshops in data analysis, basic machine learning, and introductory Python, > 500 students	
UCLA DataResolutions	Jan 2023 - Sept 2023
<i>Data Journalist</i>	<i>Los Angeles, CA</i>
- Work in teams to craft data-driven articles offering key insights into various topics, publish to Medium for public access - Perform analysis, regression, produce visualizations with R (ggplot2), Python (pandas, matplotlib, seaborn, sklearn), Tableau	
UCLA Undergraduate Math Council	Sept 2021 - Sept 2024
<i>Co-Student Support Director</i>	<i>Los Angeles, CA</i>
- Collect information from math students via surveys about math course content, difficulty, prerequisites, etc. - Analyze student survey feedback to revise and provide accurate course descriptions to math students, > 400 students - Communicate key survey information with other council members to improve student support via major maps, advice column
