

Damien Ha

damienmaiha@yahoo.com | damienmaiha@gmail.com | hadamien4612@ucla.edu | (408) 826-9403

SKILLS

Programming/Technologies	Python (matplotlib, numpy, pandas, plotly, seaborn, sklearn, tensorflow), R (dplyr, ggplot2, rvest, shiny, tidyverse), C++, Tableau, SQL, Git/GitHub
Skills	Data Analysis, Mathematics, Statistics, Google Suite, Microsoft Office, Teamwork, Customer Service
Languages	American Sign Language (intermediate), Spanish (elementary), Vietnamese (elementary)

PROJECTS

- Business Plan, Hermanos Gutierrez** <https://github.com/damienmha/hg-marketing-plan>
- Meet and converse with artist's agents to best understand goals with streaming, social media, concerts/live performances, etc.
 - Perform market research, analyze streaming data to form comprehensive business/marketing plan for artist's next steps
 - Produce and present business plan to instructors and panel of professionals from the music industry
- Fish Weight Multiple Linear Regression** <https://github.com/damienmha/Fish-Weight-MLR>
- Conduct multiple linear regression in R on fish measurement data to better understand fishery health
 - Utilize diagnostic plots and stepwise regression to conduct variable selection/transformation, producing best regression model
- MCM 2022 Problem C: Trading Strategies** <https://github.com/damienmha/Trading-Strategies>
- Completed *Mathematical Contest in Modeling 2022 Problem C: Trading Strategies* (in collaboration with other students)
 - Created mathematical models: threshold, momentum trading, simple moving average, and bitcoin prioritization to determine the best model to maximize profits based on provided data. Used pandas, NumPy, and matplotlib to handle and model data
- Roller Coaster Classification** <https://github.com/damienmha/coaster-classification>
- Perform data cleaning and exploratory data analysis, train classification models (ex: kNN, Logistic Regression, Support Vector Machines, Decision Tree) to identify coaster track type, use accuracy score and F1 score to evaluate model performance
 - Train a neural network (deep learning) using Keras (TensorFlow), also to identify roller coasters by track type

EDUCATION

University of California, Los Angeles	Sept 2025
BS Statistics and Data Science, GPA 3.3	
<i>Relevant Coursework:</i> Computational Statistics with R, Data Analysis and Regression, Data-Driven Mathematical Modeling, Introduction to Computer Science, Linear Algebra, Music and Data Science, Music Business Now, Principles of Accounting I, Principles of Economics, Probability and Statistics, Python for Data Science, Statistical Consulting	
<i>Activities/Societies:</i> Association of Computing Machinery, Bruin Origami, DataRes (Data Journalist), Game Music Ensemble (clarinetist), Marching Band (clarinetist), National Student Data Corps (Board), Statistics Club, Symphonic Band (clarinetist)	

CERTIFICATIONS AND AWARDS

LinkedIn	Python Assessment, R Assessment
Kaggle	Introduction to Deep Learning
ASA DataFest UCLA	Finalist/Honorable Mention 2023, Best Use of External Data
California Department of Education	State Seal of Biliteracy in English and American Sign Language

EXPERIENCE

DataFest at UCLA	April 2023
<i>Hackathon Finalist</i>	<i>Los Angeles, CA</i>
• Collaborate in team to analyze legal data, draw insights allowing American Bar Association to allocate resources effectively • Utilize external economic data, do time series analysis, produce visualizations using Python, Tableau. Validate use of economic identifiers for advising on legal issues regarding unemployment cases - second place in the <i>Best Use of External Data</i> category • Determine key factors in consumer finance/unemployment, advise use of regression, ARIMA models in future analyses	
Northeast Big Data Innovation Hub - National Student Data Corps, UCLA	Jan 2023 - June 2024
<i>Board Member - Project Leader</i>	<i>Los Angeles, CA</i>
• Host social events and compile resources to facilitate a community where all students interested in data science can learn • Assist in the development of projects/workshops in data analysis, basic machine learning, and introductory Python	
UCLA DataResolutions	Jan 2023 - Sept 2023
<i>Data Journalist</i>	<i>Los Angeles, CA</i>
• Work in teams to craft data-driven articles offering key insights into various topics such as national parks and restaurants • Perform analysis, regression, produce visualizations with R (ggplot2), Python (pandas, matplotlib, seaborn, sklearn), Tableau	
UCLA Undergraduate Math Council	Sept 2021 - Sept 2024
<i>Co-Course Descriptions Director, former Event Planner</i>	<i>Los Angeles, CA</i>
• Collect information from math students via surveys about math course content, difficulty, prerequisites, etc. • Analyze student survey feedback to revise and provide accurate course descriptions to math students • Communicate key survey information with other council members to improve student support via major maps, advice column
