

Damien Ha

San Jose, CA (SF Bay Area) - open to relocation | damienmaiha@gmail.com | 408-826-9403
<https://damienmha.github.io> (personal site) | <https://www.linkedin.com/in/damien-mai-ha/> | <https://github.com/damienmha> (code repo)

SKILLS

Programming/Technologies Python (numpy, pandas, matplotlib, seaborn, sklearn, tensorflow, torch, nltk), R (dplyr, ggplot2, rvest, tidyverse), Tableau, SQL/PostgreSQL/db2, aws s3, git/github, jupyterlab, c++, html/css
Data Skills Exploratory Data Analysis, Data Visualization, Data Cleaning, Regression, Machine Learning, Excel
Languages American Sign Language (intermediate), Spanish (beginner), Vietnamese (beginner)

EXPERIENCE

- Santa Clara County Registrar of Voters** **April 2026 - Present**
Election Aide *San Jose, CA*
 - Assisted voters with check-in, ballot distribution, and voting procedures while providing professional customer service
 - Supported operations by setting up voting equipment, processing forms, and ensuring ballots were handled securely
 - Communicated voting instructions, answered voter questions, collaborated with team to maintain organized voting environment
- Extern, Beats by Dre, Qualitative and Quantitative Insights Project** **Sept 2025 - Dec 2025**
Data Analytics Extern *Remote*
 - Analyzed consumer sentiment toward Beats products using survey data, NLP methods, and analytics in Excel and Python
 - Built visualizations and sentiment-tracking outputs in Colab/Jupyter and Tableau to inform product and marketing decisions
- UCLA Undergraduate Math Council** **Sept 2021 - Sept 2024**
Student Support Co-Director *Los Angeles, CA*
 - Analyzed surveys targeting 600+ students to evaluate course difficulty, prerequisites, and learning experience in math
 - Helped produce course descriptions and advice resources for math students, targeting hundreds of students each quarter
 - Communicated insights to council leadership to improve course maps and other major guidance documentation
- Northeast Big Data Innovation Hub - National Student Data Corps, UCLA** **Jan 2023 - June 2024**
Board Member - Project Lead *Los Angeles, CA*
 - Planned community events and compiled resources to support 500+ students learning statistics, data analytics and data science
 - Assist in hosting analytics workshops on introductory Python, Tableau, machine learning (cv, regression), and data visualization
 - Guided project teams by setting goals, outlining research questions, developing analysis timelines, setting delivery milestones
- DataResolutions at UCLA** **Jan 2023 - Sept 2023**
Data Analyst/Data Journalist *Los Angeles, CA*
 - Developed data-driven articles for Medium, providing insights on social/economic topics, combining storytelling and analytics
 - Conducted statistical analyses and created visualizations using R, Python, and Tableau, contributing to student journalism
- ASA DataFest at UCLA** **April 2023 - April 2023**
Data Hackathon Finalist *Los Angeles, CA*
 - Analyzed legal data in a team for ABA resource allocation. Sourced economic data, performed time series/regression analysis, found 0.658 correlation with unemployment and legal cases, 0.843 correlation with consumer credit and consumer finance
 - Recommended regression and ARIMA-based modeling approaches in future; won 2nd place in Best Use of External Data

PROJECTS

- CollabTrack, Case Study, Product Lead** <https://github.com/damienmha/collabtrack>
 - Developed secure MVP version control app (Flask/PostgreSQL/AWS S3) demonstrating end-to-end cloud/database integration
 - Designed/implemented a full data lifecycle with secure uploads, version tracking, pre-signed S3 URL generation for downloads
 - Enforced security with bcrypt authentication, session management, and dotenv credential segregation for production readiness
- Roller Coaster Classification** <https://github.com/damienmha/coaster-classification>
 - Performed data cleaning and EDA on two coaster design datasets with pandas, numpy, matplotlib, and seaborn
 - Trained multiple classification models (kNN, XGBoost, Random Forest, SVM), achieving 95% accuracy and F1 score
 - Currently training Keras and Torch neural networks to compare classic ML classification vs. deep learning model performance
- Fish Weight Multiple Linear Regression** <https://github.com/damienmha/Fish-Weight-MLR>
 - Built a multiple linear regression model in R to predict fish weight from morphological measurements, achieving $R^2 = 0.99$
 - Performed variable selection using stepwise regression, Box-Cox transforms, and diagnostics to validate model assumptions
 - Identified and quantified most influential predictors producing an interpretable, high-accuracy model assessing fishery health

EDUCATION

- University of California, Los Angeles** **Sept 2020 - Sept 2025**
BS Statistics and Data Science
Relevant Coursework: Computational Statistics, Data Analysis & Regression, Data Science, Linear Models, Monte Carlo Methods, Music and Data Science, Statistical Optimization, Principles of Economics, Probability & Statistics
Activities/Societies: Association of Computing Machinery, Bruin Origami, Game Music Ensemble (clarinetist), Marching Band (clarinetist), Residential Life (Community Representative), Statistics & Data Science Club, Symphonic Band (clarinetist)

CERTIFICATES AND AWARDS

Python and R Assessments (LinkedIn), Introduction to Deep Learning (Kaggle), State Seal of Bilingualism in ASL (CA Department of Education)
